

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0050] found on pages 6 and 7 of the specification as follows:

-- **[0050]** As illustrated by Fig. 3, the symbols of pavement tape 100 also may be non-language symbols. Fig. 3 depicts a top view of a section of another continuous pavement tape. The symbols ~~405~~102 of this pavement tape are fanciful, comprising a star, a snowman and a snowflake. The symbols also could relate to motorist activity or safety. Thus, the symbols could be turn arrows, stop indicators, road condition indicators, detour indicators, disabled indicators and the like. Beyond this, the symbols could be pictures of hotels, motels, eating establishments, gasoline stations and other services of interest to motorists and pedestrians. These symbols could be combined with language-based symbols to form a composite message for the motorist or pedestrian.--

Please amend paragraph [0088] on page 15 of the specification as follows:

--**[0088]** Fig. 22 depicts the composite tape of Fig. ~~44~~17 with a layer of reflective glass beads 206. This layer of reflective glass beads is covered with protective coating 216. A protective coating is often useful for protecting the perforated pavement tapes and composite structures discussed above, whether or not they are covered with reflective glass beads.--

AMENDMENTS TO THE DRAWINGS

The 5 attached sheets of formal drawings replace the original sheets containing FIGS. 1-3A, 4-6, 13C, 13D, 17-20 and 21-22, and include changes to FIGS. 2, 3, 5, 6, 13C, 13D, 20 and 21. No new matter is added.

Attachments: 6 Replacement Sheets.
